STAT

MEMORANDUM FOR: Chief, Management Staff

SUBJECT: Revision of FBID/00 Table of Organization,
Hokkaido Bureau

1. Attached as Tab A is a memorandum from the Deputy Assistant Director for Operations dated November 1954 requesting the addition of 1 teletype operator to the Native T/O of the Hokkaido Bureau of FBID. The addition of this position would increase the Native T/O of the Hokkaido Bureau from [redacted] positions.

2. Owing to recently expanded activity in Russian-language monitoring at Hokkaido, it seems advisable, in the interest of full and timely exploitation of significant intelligence information, to add a third teletype shift and extend teletype coverage at that Bureau to seven days a week. Such extension of coverage will require the addition of one teletype operator to the present staff.

3. This request has been informally coordinated with and concurred in by DD/I (Admin) [redacted] the Budget Division [redacted], and the Classification and Wage Division [redacted].

4. The estimated cost of the additional position (\$650 annually), can be accommodated within presently allocated funds; the FBID position ceiling would not be affected inasmuch as Native T/O's are excluded from the FBID ceiling limitation; and no significant change in function is indicated.

5. It is recommended that you approve the basic request for the addition of one teletype operator position to the Native T/O of the Hokkaido Bureau, FBID.
